Parkland School Division

Accountability Pillar Results Report for 2018-2019

November 1, 2019

WHERE THE WORLD OPENS UP

The Accountability Pillar surveys are administered annually and throughout the province, during the months of January to March to:

- Students in Grades 4, 7 and 10;
- Students in Grades 4 through 9 (in small schools);
- Parents of students in Grades 4, 7 and 10; and
- Teachers.

Students and teachers complete the surveys online at school while parents receive a copy of the survey that can be completed online, or by mail. Parent surveys are returned directly to Alberta Education.

Responses are collected and tabulated into a summary chart released in May and are updated in October to supplement updated academic achievement results through the Provincial Achievement Tests (grade 6 and 9) and the Diploma Examination results (Divisional and First Nations, Métis and Inuit specific). These achievement reports are provided in a separate summary report on our school's website.

This Accountability Pillar Results Report includes our school's overall summary and new results for all survey measures.

Approximate Survey Responses:

- 19 parents in our school responded to the survey. This is up from 10 last year. Unfortunately, low survey responses may not accurately represent our parent population.
- In Parkland School Division, approximately 459 parents responded to the survey. The five-year average for parent responses is approximately 406.
- In Parkland School Division: 2,560 Students (960 in grades 4-6, 700 in 7-9 and 900 in 10-12) responded; this included 205 students who responded from our school.
- In Parkland School Division, 457 teachers responded; this included 25 teachers from our school.

These are approximate numbers as not every respondent answers every question.

Highlights and Celebrations

Stony Plain Central School continues to celebrate the strong work of staff, students and our overall community.

- It is noteworthy that Stony Plain Central experienced growth in all of the eleven measures.
- The staff and students have established in excess of thirty community partnerships thereby leading to satisfaction with the accessibility, effectiveness and efficiency of programs and services in our community.

- The most significant growth was in the area of students being taught attitudes and behaviors that will make them successful at work when they finish school. The implementation of year-long Career and Technology Study (CTS) courses as well as term CTS courses supports student engagement and positive attitudes and perceptions about learning.

Parkland School Division's Ultimate Goal is Student Success and Well-Being. To this end, the Board's current Education Plan targets nine assurance elements in student growth, teaching and leading and learning supports.

There are still some areas for growth within our Accountability Pillar Survey results. Stony Plain Central School is committed to improvement and continuing to learn and grow with our community. For our action items related to this report, please visit our school's Education Plan section of our website.

Areas Requiring Strategic Planning

- Teachers and parents indicate that there is a need around increased opportunities for parental involvement in decisions about their child's education. While Stony Plain Central showed no decline in this measure from the previous year, nor was growth evident. This may be a result of parents not recognizing ways in which they can become involved aside from being in the school. Parents who work during the day need to be reminded of ways in which they can become involved.
- While growth was evident, teachers, parents and students indicate that satisfaction with the accessibility, effectiveness and efficiency of programs and services for students could be further increased. This may be a result of decreased availability and an increased need for external services and supports for students.
